APPENDIX: Tables

INTRODUCTION

Act 906 of the 2001 session of the Arkansas legislature requires the Arkansas Division of Children and Family Services (DCFS) to conduct an annual evaluation of family preservation services. The Act specifies several types of services, including those designed to prevent the removal of children from their homes, facilitate the reunification of families with children who have been removed from their homes, and help children attain safe and appropriate permanent living arrangements in the event that reunification does not occur.

These services encompass virtually all activities DCFS performs in its work with families and children. In this sense, any child or family that DCFS has assessed and/or for whom the agency has opened a case can be said to be in need of family preservation services. This report addresses whether the assistance and services that children and their families receive lead to positive results.

Within this context, the following report examines DCFS's performance during calendar year 2024 compared with its performance during the preceding two years. Many of the metrics analyzed herein replicate indicators currently monitored by the federal Children's Bureau, while other metrics are commonly used within Arkansas's and other states' child welfare systems. The report metrics are structured around safety, permanency, and well-being.

In addition to assessing statewide performance, this report examines individual service areas and counties' ability to keep children safe, help them gain permanency, and promote their well-being; their performance is detailed in the report as well.

SAFETY

REPORTS ACCEPTED FOR CHILD MALTREATMENT ASSESSMENT

During 2024, Arkansas accepted 25,244 child maltreatment reports for an investigation. The number of reports accepted for investigation decreased by 6% from the previous year.

Of those investigations, 19,322 (77%) were assigned to DCFS; the remaining 5,922 (23%) were assigned to the Arkansas State Police Crimes Against Children Division.

DCFS was also responsible for all 5,657 reports that were accepted for differential response (DR) during the year. The number of DRs received increased by 5% from the previous year (Figure 1).

Of assessments (investigations and DRs combined) assigned to DCFS during 2024, 17% originated from Area 1 and 14% originated from Area 8. DCFS staff from Area 10 received the fewest total assessments, followed by those in Areas 4 and 7 (Figure 2).

Figure 1
Accepted Child Maltreatment Reports Statewide

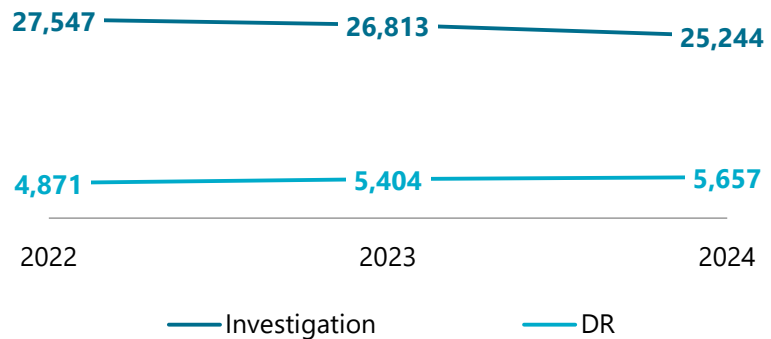

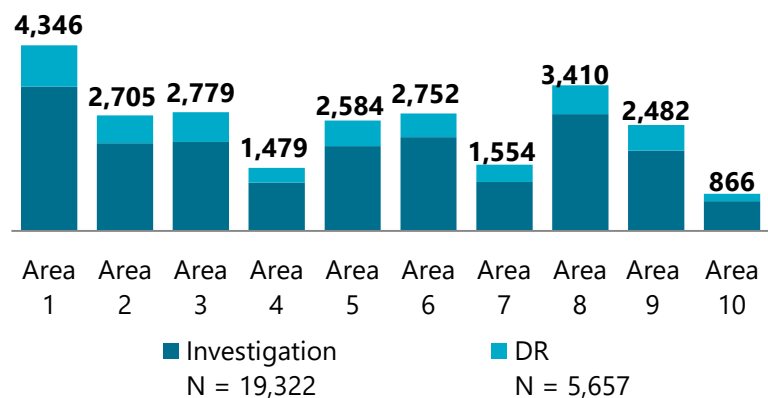

Figure 2
Total Reports Assigned to DCFS by Area

Note: Twenty-two reports accepted did not have a county and area identified for the incident.

CHILD MALTREATMENT INVESTIGATIONS

TIMELINESS OF INITIATING INVESTIGATIONS

DCFS staff must see alleged victims within 24 hours of receipt of a priority one report and 72 hours of receipt of a priority two report. Agency staff statewide initiated 76% of their investigations on time during 2024 (Figure 3).

Areas 2 and 9 had the highest rate (87%) of investigations initiated in a timely manner during the year, followed by Areas 4 and 10. Within these areas, the better performing counties were Crawford, Johnson, Logan, and Scott (Area 2); Cleburne, Independence, Jackson, and Stone (Area 9); Lafayette and Little River (Area 4); and Ashley, Chicot, Desha, and Drew (Area 10).

For the sixth consecutive year, the lowest timely initiation rate was observed in Area 6 (47%), i.e., Pulaski County (Figure 4).

Among other individual counties, the struggle to initiate investigations on time in Lonoke (50%) and Prairie (39%) counties negatively impacted Area 7's initiation rate, while the same could be said about Garland (64%), Montgomery (60%), and Polk (59%) counties in Area 3.

Appendix Table A1 displays, by county, the percentage of investigations with timely initiation.

Figure 3
Timely Investigation Initiation Statewide

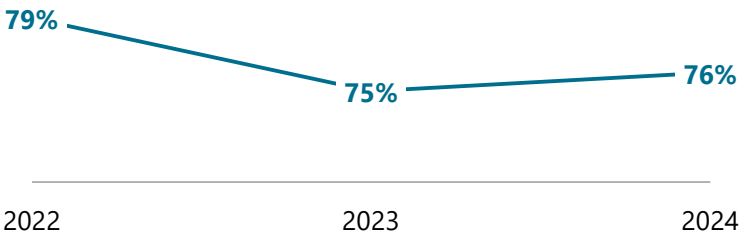

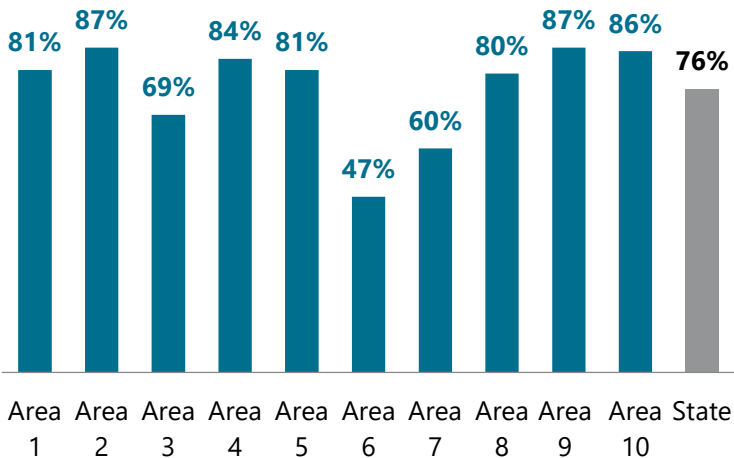

Figure 4
Timely Investigation Initiation by Area

TIMELINESS OF COMPLETING INVESTIGATIONS

Investigations are to be completed within 45 days of receipt of the report. In select instances, a 15-day extension may be granted, resulting in a 60-day completion requirement. DCFS completed 79% of its investigations on time in 2024, similar to the previous year (Figure 5).

Area 10 completed nearly all of their investigations on time, and Areas 4 and 9 had the next highest timely completion rates (Figure 6). Within Area 10, all counties completed over 97% of investigations on time.

The rate of timely completion decreased considerably in Areas 6 and 7 from 2023 to 2024—97% to 77% for Area 6 and 73% to 52% for Area 7. In Area 7, Bradley (34%), Cleveland (38%), Dallas (45%), and Jefferson (24%) counties had the lowest timely completion rates during 2024.

Though Area 3’s timely completion rate jumped from 51% in 2023 to 68% in 2024, the Area’s timely completion rate remains comparatively low.

Appendix Table A2 displays the percentage of investigations completed on time by county.

Figure 5
Timely Investigation Completion Statewide

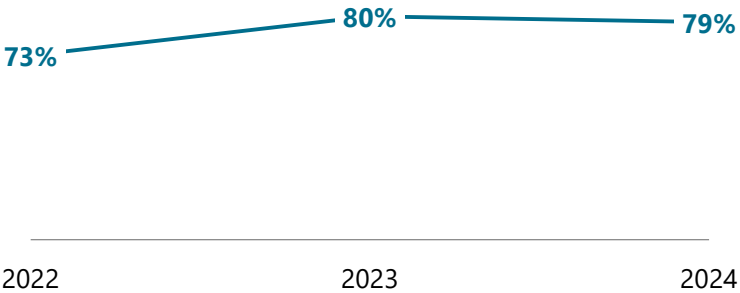

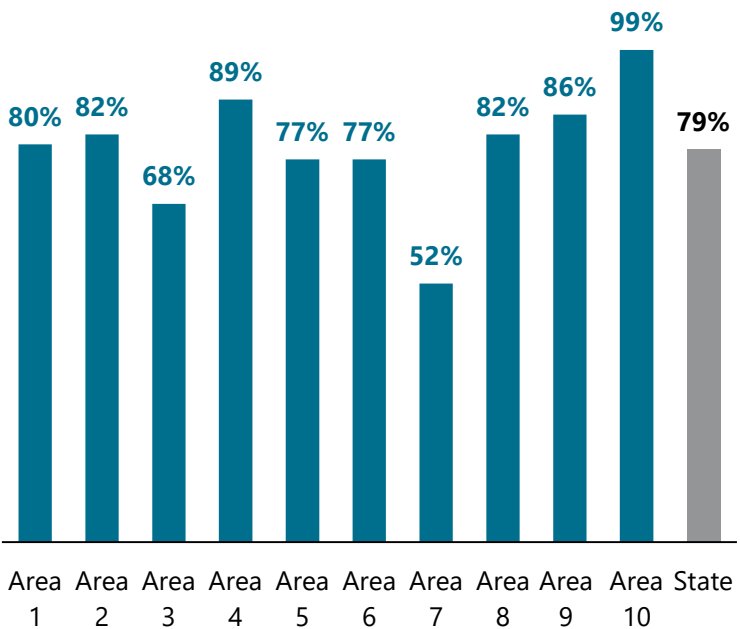

Figure 6
Timely Investigation Completion by Area

SUBSTANTIATION OF INVESTIGATIONS

Of all DCFS investigations received during 2024, 19% were substantiated (Figure 7).

DCFS staff from Area 8 (22%) had the highest rate of substantiated investigations, followed by Areas 4 and 5 (21% each). The lowest substantiation rates were observed in Areas 1, 6, and 7 (Figure 8).

Among individual counties, investigations were substantiated at the lowest rates in Benton (Area 1), Scott (Area 2), Saline (Area 3), Nevada (Area 4), Marion (Area 5), Grant, Lonoke and Prairie (Area 7), White (Area 9), and Ashley and Desha (Area 10).

Meanwhile, over one quarter of investigations were substantiated for the following counties: Johnson (Area 2); Montgomery (Area 3); Columbia and Little River (Area 4); Baxter and Pope (Area 5); Calhoun, Dallas, and Lincoln (Area 7); Fulton, Izard, and Lawrence (Area 8); Jackson and Poinsett (Area 9); and Monroe and St. Francis (Area 10).

Appendix Table A3 displays the percentage of substantiated investigations by county.

Figure 7
Percentage of Substantiated DCFS Investigations Statewide

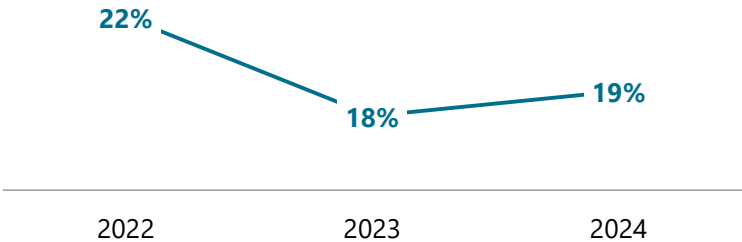

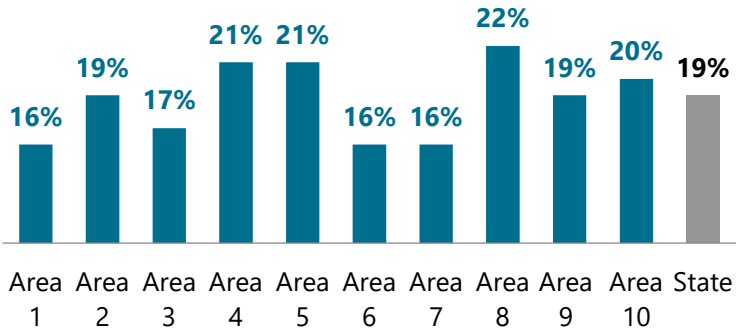

Figure 8
Percentage of Substantiated DCFS Investigations by Area

PREVENTING MALTREATMENT RECURRENCE

Recurrence of maltreatment is measured by examining all victim children maltreated during a 12-month period and identifying how many were revictimized within the next 12 months. For example, for 2024, all child victims of maltreatment during 2023 were tracked to see whether they were victims of a subsequent maltreatment report within 12 months of the initial report.

Of victim children in Arkansas, 4% experienced a recurrence of maltreatment within 12 months of a substantiation for 2024. DCFS met the national standard with respect to the recurrence of maltreatment for each of the past three years (Figure 9). All 10 areas achieved the national standard (Figure 10).

Nearly all counties (72 of 75) in Arkansas met the standard individually; those that did not were Arkansas, Lee, and Monroe counties.

Appendix Table A4 displays the percentage of children who experienced maltreatment recurrence by county.

Figure 9
Recurrence Within 12 Months Statewide

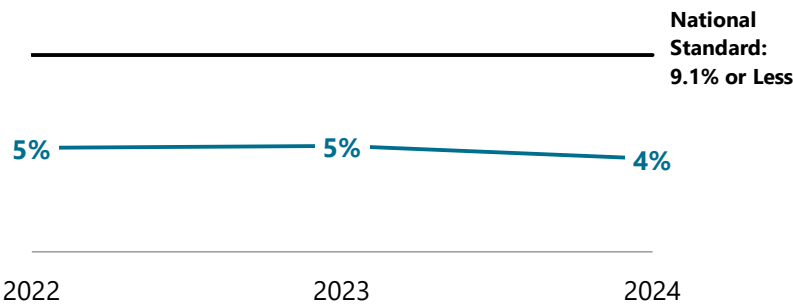

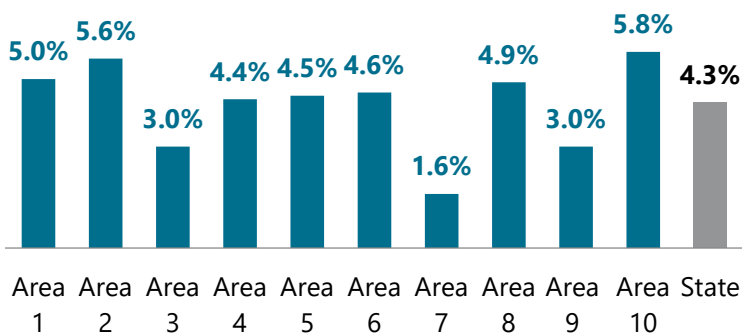

Figure 10
Recurrence Within 12 Months by Area

DIFFERENTIAL RESPONSE ASSESSMENTS

TIMELINESS OF INITIATING DR REFERRAL

DCFS must see all alleged victim children and at least one caregiver within 72 hours for DR referrals. Arkansas initiated 66% of DRs on time during 2024, an improvement over the previous two years (Figure 11).

Area 10 had the highest rate (92%) of DR referrals initiated in a timely manner during the year, followed by Area 6 (86%). Within Area 10, over 95% of DR referrals from Arkansas, Ashley, Chicot, Desha, Drew, and Lee counties were initiated on time.

Areas 3 and 7 struggled the most at initiating DRs on time, doing so just about one third of the time (Figure 12). Less than a third of DRs were initiated on time in numerous counties throughout these two areas, including Howard and Saline in Area 3, and Bradley, Cleveland, Dallas, Jefferson, and Prairie in Area 7.

Appendix Table A5 displays the percentage of timely DRs initiated by county.

Figure 11
Timely DR Referral Initiation Statewide

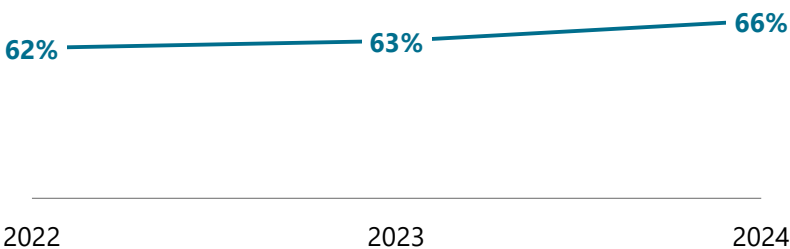

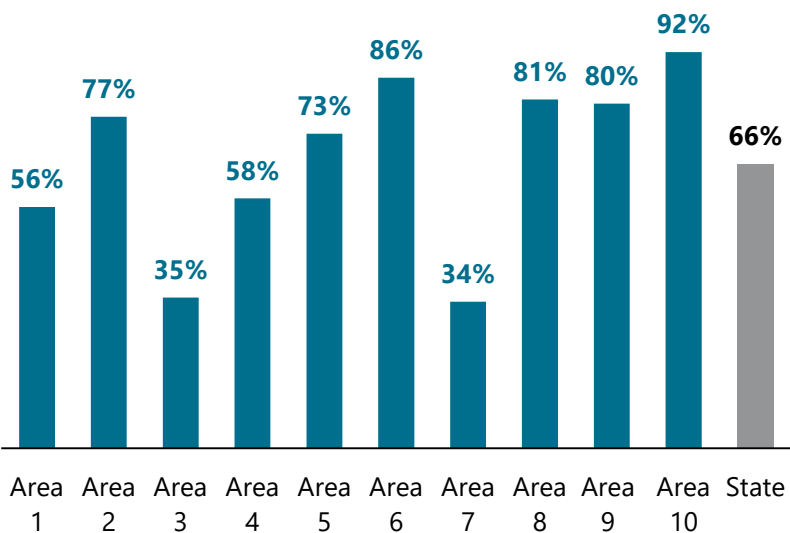

Figure 12
Timely DR Referral Initiation by Area

TIMELINESS OF COMPLETING DR REFERRALS

Reports assigned for DR must be closed within 30 days of receipt of the report. In certain instances when the families’ needs necessitate longer involvement, up to two 15-day extensions can be granted, for a total of 60 days. DCFS completed 72% of DRs on time for 2024, an increase over the on-time completion rate observed for the two previous years (Figure 13).

Four of the 10 areas—Areas 2, 4, 9, and 10—performed well with regard to completing DRs on time. Timely completion of DR referrals ranged from 95% to 98% for counties in Area 2. Among the counties in the other three well-performing areas, all DR referrals were completed on time in Miller and Nevada (Area 4); Independence, Jackson, and Stone (Area 9); and Arkansas, Lee, Monroe, and St. Francis (Area 10).

Area 6 performed least well at completing DRs on time (49%), followed by Areas 1 (57%), 5 (58%), and 7 (58%). Although they lagged behind the statewide average, the timely completion rates in Areas 3, 5 and 6 increased at least 23 percentage points from 2023 to 2024.

Appendix Table A6 displays timely DR completion by county.

Figure 13
Timely DR Referral Completion Statewide

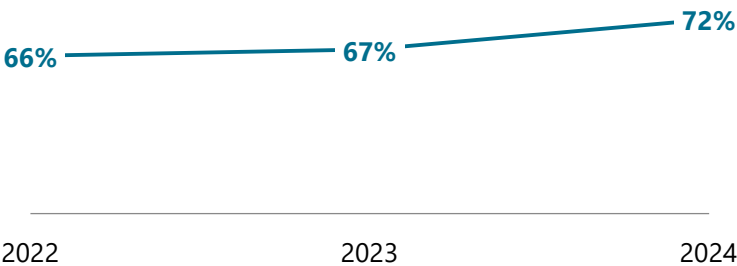

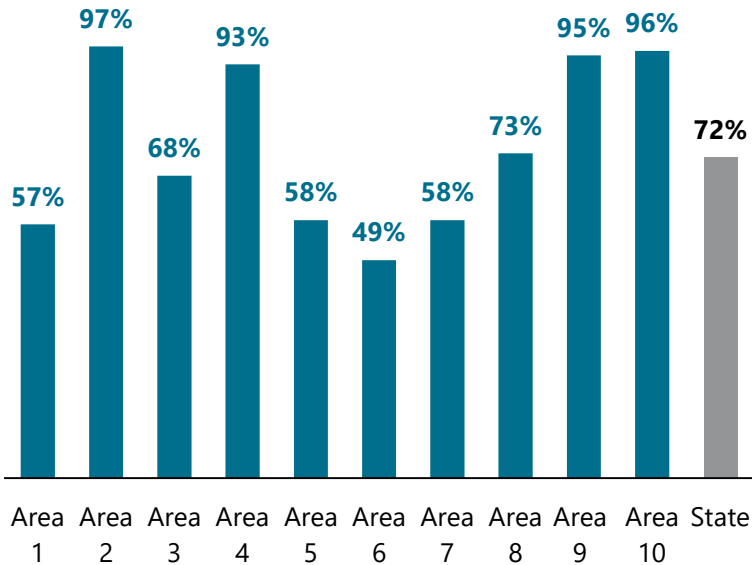

Figure 14
Timely DR Referral Completion by Area

IN-HOME PROTECTIVE SERVICES CASES

When child maltreatment necessitates DCFS involvement with a family but there is no immediate threat to any child’s safety, the agency can provide in-home protective services to the family in which no children are removed from the home. DCFS was responsible for 1,326 open in-home protective services cases at the end of 2024, which was less than the number of open cases in the previous two years (Figure 15).

Figure 16 displays the number of in-home protective services cases by area, which decreased in six of the 10 areas since the end of 2023. The largest declines occurred in Areas 1 (144 to 100), 2 (224 to 175), 4 (95 to 60), and 7 (132 to 68). The largest increase in in-home cases occurred in Area 8 (156 to 197).

Appendix Table A7 reviews the number of in-home protective services cases open at the end of the year by county.

It warrants mentioning that—while in-home protective services cases have decreased by about 800 from 2022 to 2024—the number of in-home *supportive services* cases increased by about 200 (from 271 to 465; not pictured). In general, DCFS offers supportive services to families on a voluntary, time-limited basis.

Figure 15
Open In-Home Protective Services Cases Statewide

Open In-Home Protective Services Cases by Area

N = 1,326

DISCUSSION

STRENGTHS

Arkansas accepted 25,244 child maltreatment reports for investigation and another 5,657 for DR in 2024. Compared to the previous year, the number of investigations accepted decreased by 6% and DRs increased by 5%. In 2024, DCFS was responsible for 19,322 (77%) investigations and all DRs received.

DCFS made progress at initiating investigations and DRs sooner than it did during the previous year, and it also completed a higher percentage of DRs on time. DCFS does particularly well at preventing the recurrence of maltreatment within 12 months of a substantiated report, bettering the national standard (9.1% or less) for each of the last five years. All 10 areas met the standard for 2024, and nearly all counties did so as well.

Arkansas continues to improve the process by which it assesses children's safety in recent years. Child welfare staff routinely receive training on Safety Organized Practice (SOP) and Structured Decision Making (SDM) guidelines, which ensures that safety decisions being made in response to allegations of maltreatment are consistent and uniform across the state. Furthermore, DCFS implemented Team Decision Making (TDM)—an evidence-based approach that involves agency staff meeting with the child who is at risk of removal, the child's family, and other family supports to collaborate as to how to best keep the child safe—statewide in December 2024.

AREAS FOR IMPROVEMENT

Performance must continue to improve across the state to ensure that the alleged victim children cited in reports of maltreatment are seen and assessed sooner. Agency workers initiated 76% and completed 79% of their investigations on time during 2024, and they initiated 66% and completed 72% of DRs on time.

Investigations and DRs originating from certain areas were less likely to be initiated and completed on time than those from other parts of the state. It was especially challenging for DCFS staff to initiate and complete the investigations and DRs originating from Areas 3, 6, and 7.

PERMANENCY

CHILDREN IN FOSTER CARE

THE POPULATION

A total of 3,388 children were in foster care at the end of 2024, a 7% decrease from one year prior (Figure 17). The number of children in foster care is approximately 35% lower than the all-time high of 5,234 in 2016 (not shown). Figure 18 displays children in care by area.

The foster child population declined in seven of the 10 areas during the year. The largest decline occurred in Area 2 (663 to 568 children), but considerable decreases were also observed in Areas 6 (488 to 415), 4 (291 to 231), and 9 (451 to 393).

Within those areas, the largest net decreases occurred in Franklin (55 to 28) and Sebastian (404 to 354) counties in Area 2, Miller (118 to 80) in Area 4, Pulaski (488 to 415) in Area 6, and Poinsett (97 to 68) in Area 9.

The number of children in care increased in just over one third of the state's counties (27 of 75). The largest net increases occurred in Craighead (82 to 134), Randolph (33 to 48), and St. Francis (20 to 39) counties.

Appendix Table A8 displays the number of children in care at the end of the year by county.

Figure 17
Children in Foster Care Statewide

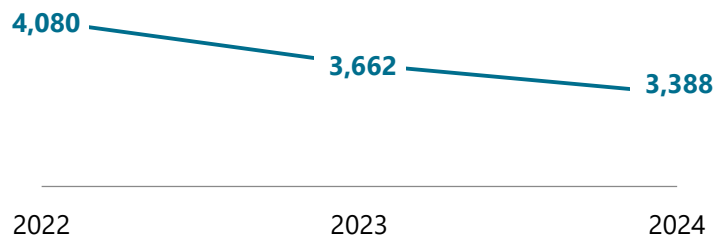

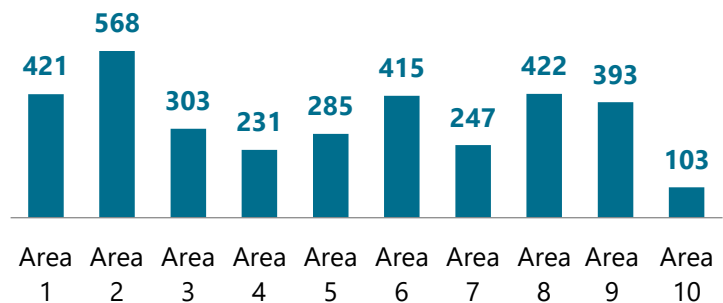

Figure 18
Children in Foster Care by Area

N = 3,388

PROXIMITY OF CHILDREN'S PLACEMENTS

Of children in care at the end of 2024, 65% were residing in a placement setting either within the same county from which they were removed or a neighboring county (Figure 19). This is a decrease from the previous two years.

Children from Area 6 (i.e., Pulaski County) were mostly likely to be placed in close proximity to their homes, followed by those from Areas 3 and 1 (Figure 20).

Meanwhile, the percentage of children placed near their homes was below the statewide average in Areas 2, 5, 7, 8, 9, and 10. Some noteworthy counties that struggled with home proximity within these areas included—but were not limited to—Crawford and Logan (Area 2), Faulkner and Pope (Area 5), Craighead and Greene (Area 8), and Crittenden and Poinsett (Area 9).

Counties that positively impacted performance in their respective areas included Benton (76%) in Area 1, Hot Spring (97%) in Area 3, Little River (71%) and Union (71%) in Area 4, Boone (89%) in Area 5, and Jackson (92%), White (80%), and Cleburne (72%) in Area 9.

Appendix Table A9 displays the percentage of foster children placed in (1) their home county and (2) their home county or a neighboring county, by removal county.

Figure 19
Proximity of Child's Placement
(Same or Neighboring County) Statewide

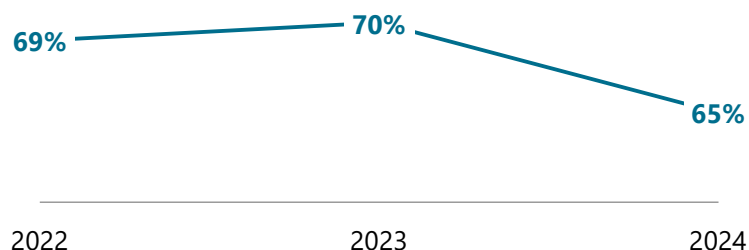

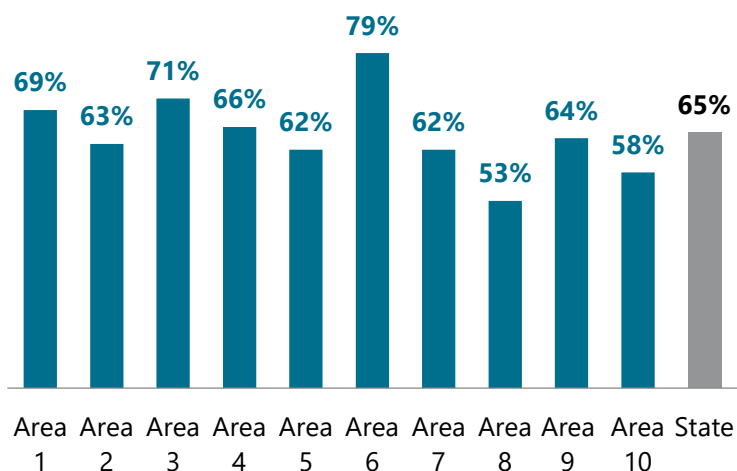

Figure 20
Proximity of Child's Placement
(Same or Neighboring County) by Area

CHILD REMOVALS AFTER SUBSTANTIATION

DCFS staff removed nearly 17% of victim children in response to a true report (i.e., the children were removed from their home either during the investigation or within 10 days of its closure) in 2024, similar to the rate observed for the previous two years (Figure 21).

Victim children from Areas 9 (14%) and 10 (13%) were least likely to be removed in response to a true report (i.e., substantiation; Figure 22). For 2023, victim children from Area 8 were least likely to be removed in response to a true report (8%), but the Area’s removal rate more than doubled to 17% in 2024.

Victim children from Area 2 were the most likely to be removed in response to a true report (24%). Within Area 2, over a third of victim children from Johnson and Sebastian counties were removed from their homes in response to a true report.

From 2019 through 2023, victim children from Area 4 were most likely to be removed in response to a true report (24% in 2023); this year, the rate in Area 4 fell to 16%, which is in line with the statewide average.

Appendix Table A10 displays the percentage of children removed from their homes in response to a true report by county.

Figure 21
Child Removal After Substantiation Statewide

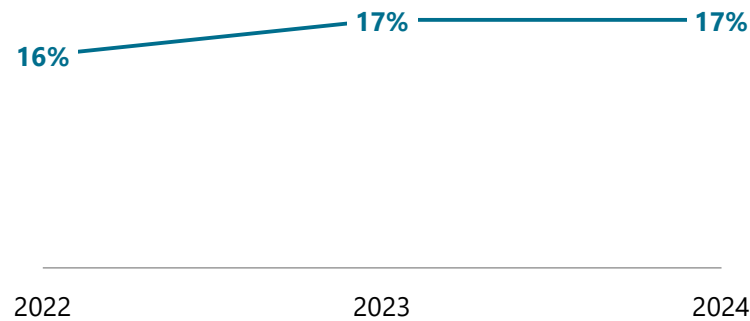

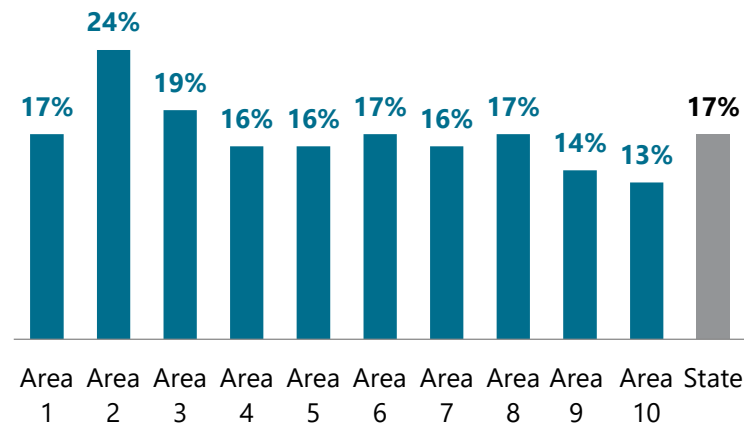

Figure 22
Child Removal After Substantiation by Area

PERFORMANCE METRICS ON PERMANENCY

PLACEMENT WITH RELATIVES

Data show that children placed with relatives achieve better outcomes than those placed with non-relatives. As a result, DCFS has made a deliberate effort in recent years to use relatives as appropriate foster care placements. As of the end of 2024, 40% of children in care were in relative placements, higher than the rate observed for the previous year (Figure 23). In comparison, the relative placement rate was just under 20% in 2015 (not shown).

Eight of the 10 areas met the previous agency goal of 40% and two of the 10 areas—Areas 1 and 10—either met or came close to meeting the agency’s new goal of 50% (Figure 24). The counties that performed best within these two areas were Madison (Area 1) and Phillips (Area 10). Out of all 75 counties, 26 met the agency’s new 50% goal.

One third or less of the children in care from Areas 3 and 6 resided with relatives at the end of 2024 (Figure 24). Within Area 3, Garland, Hot Spring, Pike, Polk and Saline counties struggled to place children with relatives.

Appendix Table A11 displays the percentage of children in care residing with relatives by county.

Figure 23
Placement With Relatives Statewide

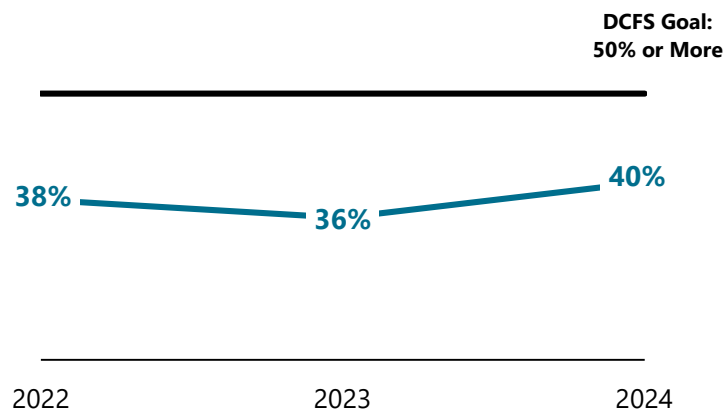

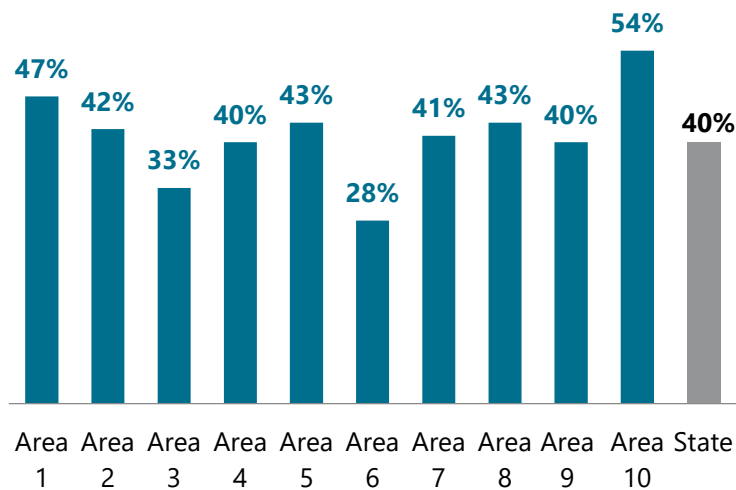

Figure 24
Placement With Relatives by Area

PLACEMENT STABILITY

Placement stability is measured by the rate of placement moves per 1,000 days in care for children who enter care over a 12-month period. The national standard is a rate of 4.12 or less.

For 2024, the placement stability rate was 5.66, a slight increase from the previous year and higher than the national standard (Figure 25). In 2015, the placement stability rate was 7.54 (not shown).

Children entering care from Areas 9 and 10 experienced, on average, greater placement stability than those entering from the remaining eight areas (Figure 26). Cleburne, Jackson, Poinsett, and White counties (Area 9) and Drew, Lee, Phillips, and St. Francis (Area 10) excelled at limiting children’s moves. Out of all 75 counties, 36 met the national standard.

Compared to 2023, the greatest improvement in placement stability was observed in Area 6 (6.37 to 4.69). The largest increase in placement rate was observed in Area 5 (4.05 to 5.90).

Children entering care from Areas 1 and 8 experienced the highest number of moves on average. The placement stability rates in Benton, Carroll, and Washington counties in Area 1 and Clay, Greene, Lawrence, and Mississippi counties in Area 8 were above 6.00 for the year.

Appendix Table A12 displays placement stability rates by county.

Figure 25
Placement Stability Rate Statewide

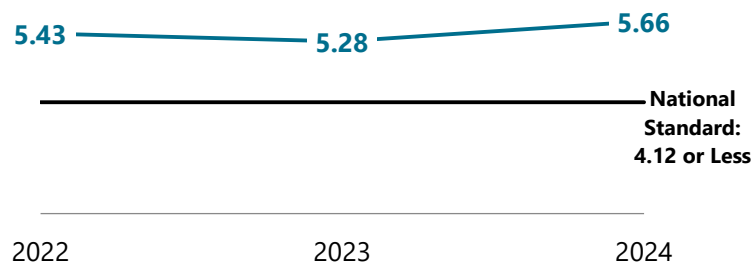

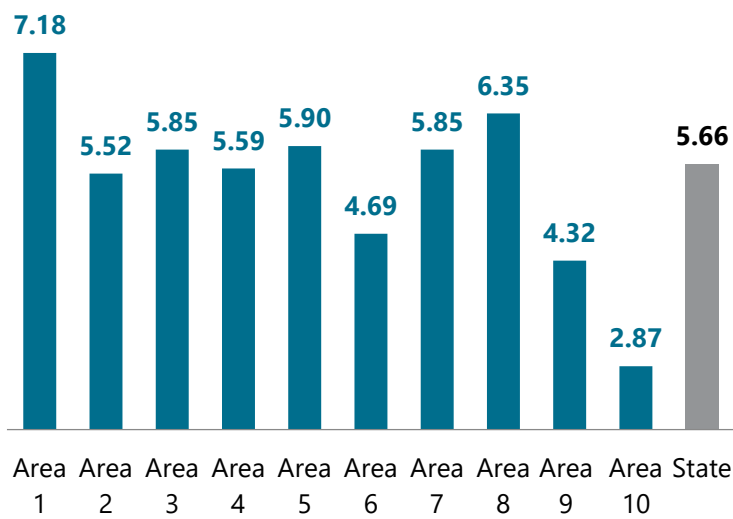

Figure 26
Placement Stability Rate by Area

REACHING PERMANENCY

For 2024, 38% of children reached permanency within 12 months of entering care; a decrease from the previous year and below the national standard of 40.5% or more (Figure 27). Discharges from foster care due to reunification, relative custody, noncustodial parent custody, guardianship, adoption, and non-relative custody are considered to be permanent living situations.

Two of the 10 areas—Areas 3 and 8—met the national standard, while Areas 1, 2, 5, 6 and 9 came close (Figure 28).

The state met the national standards of 43.6% for children in care for 12 to 23 months who reached permanency within the subsequent 12 months (57%) and the national standard of 30.3% for children in care for 24 months or longer who reached permanency within the ensuing 12 months (42%). All 10 areas met the standard for the 12- to 23-month interval. For the interval of 24 months or longer, nine of the 10 areas met the standard; Area 10 was the only exception (not shown).

Appendix Tables A13–A15 display the state’s performance with respect to achieving permanency for these three intervals by county.

Figure 27
Permanency Within 12 Months of Entering Care
Statewide

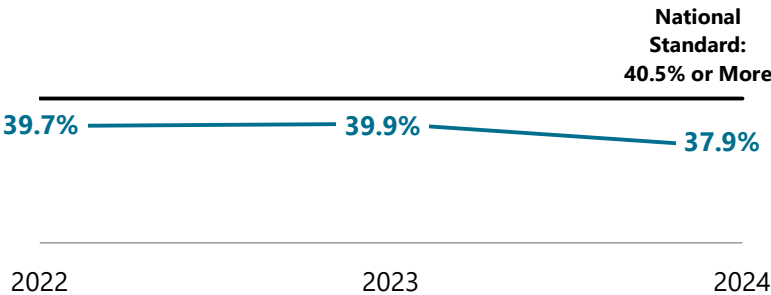

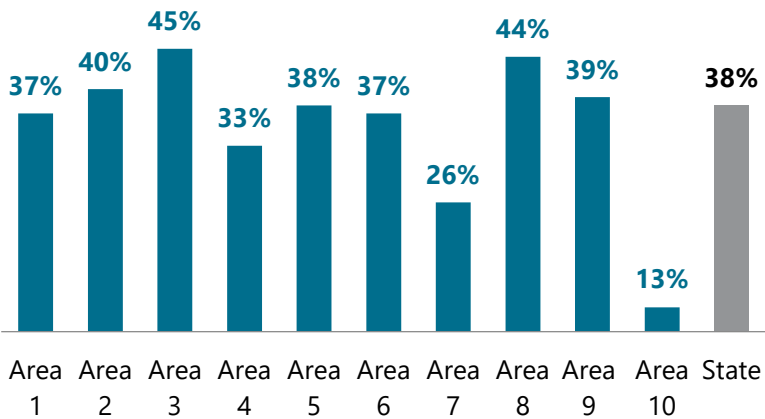

Figure 28
Permanency Within 12 Months of Entering Care by Area

PREVENTING FOSTER CARE REENTRY

Arkansas consistently meets the national standard (8.3% or less) for preventing child reentry into foster care within 12 months of discharge. For 2024, the statewide reentry rate was 5.7%, a slight increase from the previous year (Figure 29).

Seven of the 10 areas met the standard for limiting children’s reentry into care; Areas 1, 5, and 10 did not.

For 2024, nearly a quarter (23%) of the children who had reunified in Area 10 subsequently reentered care within 12 months. Eleven percent of children who had reunified in Areas 1 and 10 subsequently reentered care within 12 months (Figure 30), which signified considerable increases compared to the previous year.

The majority of counties performed well at limiting reentries in 2024; fifty-three of the 75 counties met the national standard.

Appendix Table A16 displays child foster care reentry rates by county.

Figure 29
Reentries Within 12 Months Statewide

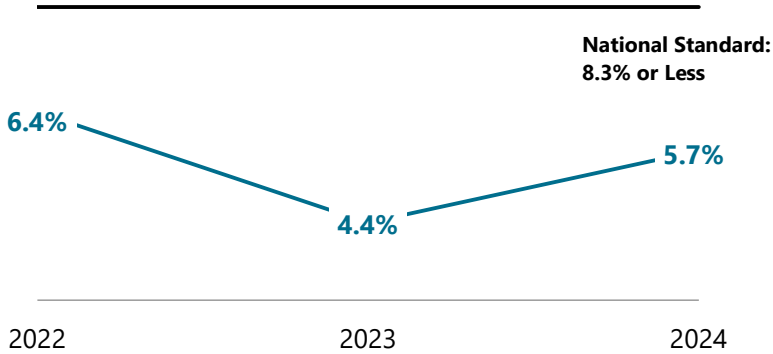

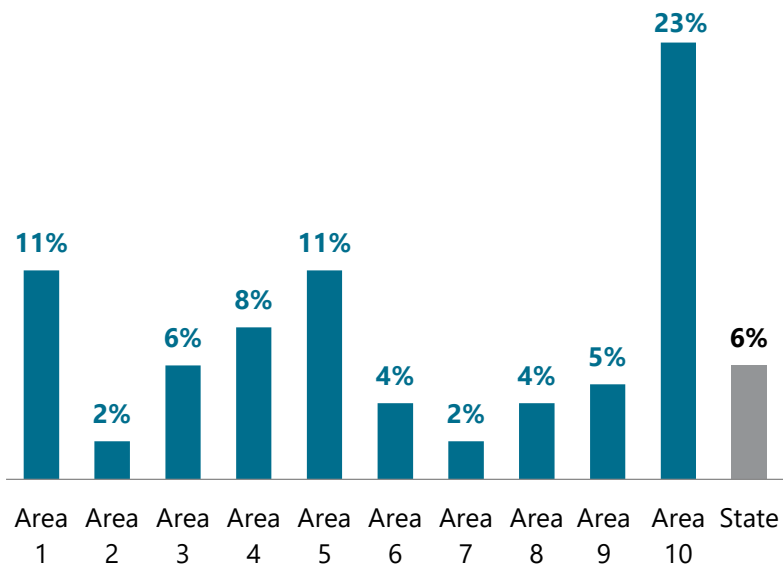

Figure 30
Reentries Within 12 Months by Area

TIME TO ADOPTION

Arkansas finalized adoptions for 628 children during 2024 (Figure 31); this was 20% lower than the number finalized during 2023.

The average length of time from termination of parental rights (TPR) until adoption finalization was 13.7 months for 2024, more than one month longer than the previous year and the national average of 12.4 (Figure 32).

In only two of the 10 areas—Areas 4 and 10—were adoptions finalized at the national average of 12.4 months; the rest took longer than the national average. The average length of time until adoption finalization decreased almost 7 months in Area 10—from 19.3 months in 2023 to 12.4 months in 2024.

Adoptions took the longest to finalize in Areas 1, 6, and 7. Adoptions in these areas averaged between 15 and 17 months. The average length of time until adoption finalization increased by seven months in Area 7—from 9.5 months in 2023 to 16.7 months in 2024.

Appendix Table A17 displays the number of finalized adoptions and the average time from TPR to adoption finalization by county.

Figure 31
Number of Finalized Adoptions Statewide

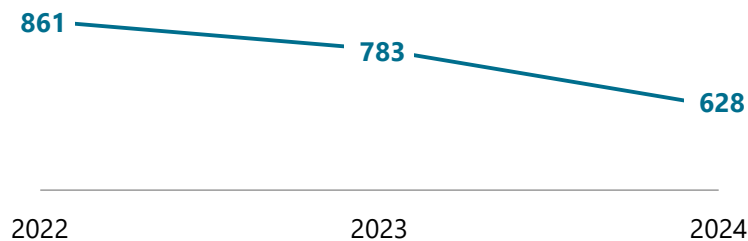

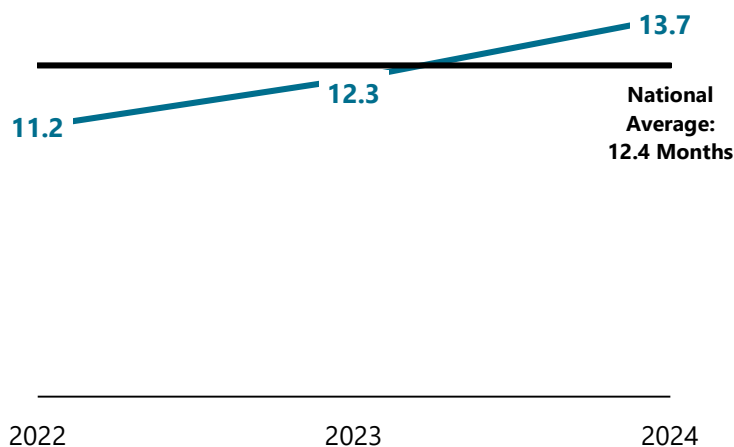

Figure 32
Time in Months From TPR to Adoption Finalization Statewide

DISCUSSION

STRENGTHS

The number of children in foster care declined during 2024; at the end of the year, 3,388 children were in care. DCFS performed well on several activities designed to preserve children's existing connections and expedite permanency.

Arkansas's research has shown that children placed with relatives have achieved better outcomes than those placed with nonrelatives. As of the end of 2024, 40% of children in foster care were residing with relatives, higher than the previous year and double the rate observed eight years prior (20%), when relatives were underutilized in many parts of the state. The use of relative placements likely has had a positive impact on Arkansas's placement stability rate, which decreased considerably over this same timeframe—from 7.54 in 2015 to 5.66 in 2024.

DCFS does fairly well at moving children in care toward permanency regardless of their length of time in care. For each of the past three years, the agency either met or came close to meeting the federal standards with respect to achieving permanency within 12 months for (1) children who entered care during the year, (2) children in care for 12 to 23 months, and (3) children in care for 24 months or longer.

DCFS likewise does well at preventing children in foster care who reunify with their families from reentering care within 12 months. Arkansas met the national standard of 8.3% or less for the seventh consecutive year.

Arkansas's consistent or improved performance on so many permanency metrics, in conjunction with the overall decline in Arkansas's foster child population, in recent years likely resulted from, at least in part, DCFS's efforts to implement and expand a range of evidence-based *prevention* services over this same period. DCFS now offers three evidence-based services—SafeCare, Triple P, and intensive in-home services—that can provide children and their families statewide with a proven alternative to immediate placement in foster care. In select parts of the state, families involved with DCFS also have access to two additional programs: Baby and Me, a parenting education and support program for parents of newborns, and 100 Families, a comprehensive support program offered by Restore Hope.

Arkansas also recently improved casework practice with respect to children in foster care. Specifically, DCFS revamped the process by which it conducts reunification assessments and reassessments to ensure that permanency efforts are consistently made.

AREAS FOR IMPROVEMENT

Though DCFS has made considerable improvements in children's foster care placement stability since 2016, the rate still falls below the national standard. The agency remains committed to identifying relative and fictive kin placements for children entering foster care since they have resulted in improved outcomes, but at the same time the agency is also making a concerted effort to onboard more nonrelative foster homes. The recruitment of nonrelative homes is occurring via contracts with private agencies along with DCFS's partnership with *Every Child Arkansas*, a coalition of child welfare advocates, faith-based organizations, and other stakeholder agencies that seeks to conduct targeted recruitment

of foster homes in each county in the state. These steps, in tandem with improved practice regarding reunification assessments, should help expedite permanency whether by returning children to their families sooner or via a more timely adoption.

A successful effort to improve Arkansas's foster care placement options would also likely lead to a higher share of foster children residing in a placement setting in close proximity to their homes, i.e., either within their removal county or a neighboring county. At the end of 2024 approximately two-thirds of children were placed in close proximity to their homes.

WELL-BEING

ASSESSING AND VISITING CHILDREN AND FAMILIES

DCFS must assess children and families in in-home and foster care cases on an ongoing basis to identify their needs and provide appropriate services. DCFS's primary means of assessing and monitoring children and families is consistent face-to-face visits. Workers must visit each child in care in the placement setting once a month; for in-home protective services cases, workers must visit family members in their home at least once a month.

DCFS workers completed 80% of visits to in-home families during 2024, an improvement over the previous year but lower than DCFS's goal of 85% (Figure 33).

Areas 10 (94%), 4 (90%), and 8 (90%) were the only areas to surpass DCFS's goal for 2024 (Figure 34). Most counties from these areas (all nine for Area 10; eight of nine for Area 4; seven of nine for Area 8) completed over 85% of their required in-home visits.

After making just over half (51%) of its required in-home visits one year prior, Area 3's visitation rate jumped to 72% for 2024.

The in-home visitation rate fell to 64% in Area 7, the lowest of all areas and far below the Area's performance from the previous year (79%).

Appendix Table A18 displays the agency's performance at visiting in-home families by county.

Figure 33
Monthly Worker Visitation With In-Home Families Statewide

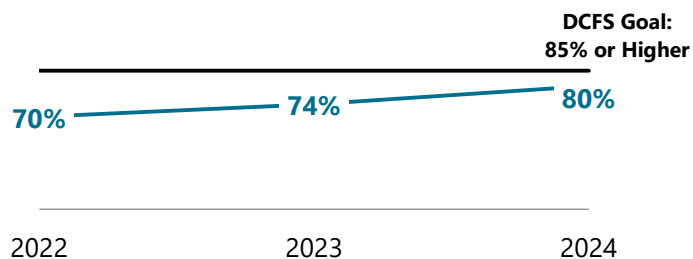

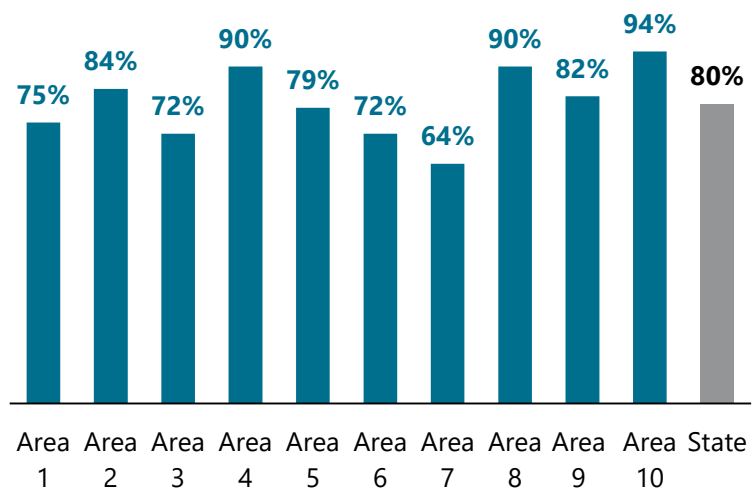

Figure 34
Monthly Worker Visitation With In-Home Families by Area

VISITING CHILDREN IN FOSTER CARE

DCFS completed 80% of its required monthly visits to see foster children in their placements during 2024, which was five percentage points higher than the visitation rate observed in 2022 (Figure 35).

Only Area 10 met DCFS’s goal of 95% for monthly visits to see foster children during 2024, though Area 4 nearly did so (Figure 36). Area 8 (91%) came next-closest to meeting the agency’s goal. Five of the nine counties in Area 4, four of the nine counties in Area 8, and all nine counties in Area 10 completed at least 95% of their monthly visits.

Area 6 (i.e., Pulaski County) had the lowest foster child visitation rate for the fifth consecutive year.

Aside from Pulaski County, DCFS staff made less than two thirds of required foster child visits in the following counties: Benton in Area 1; Boone in Area 5; and Jefferson and Prairie in Area 7.

Appendix Table A19 displays the agency’s rate of visiting children in care by county.

Figure 35
Monthly Worker Visitation With Children in Foster Care Statewide

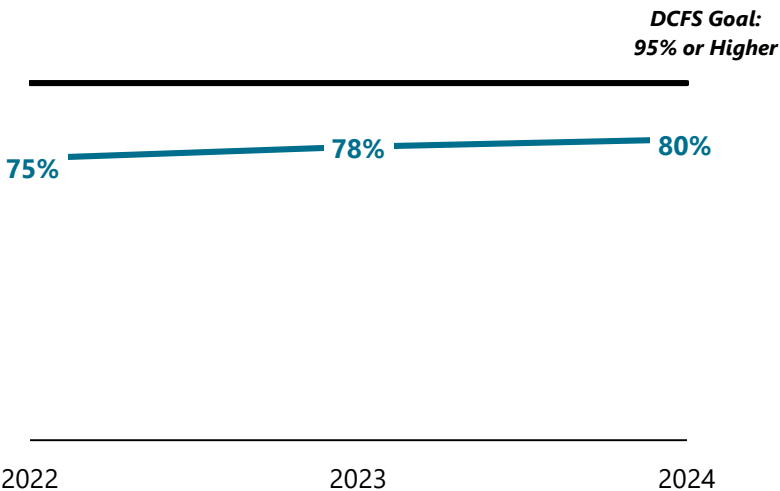

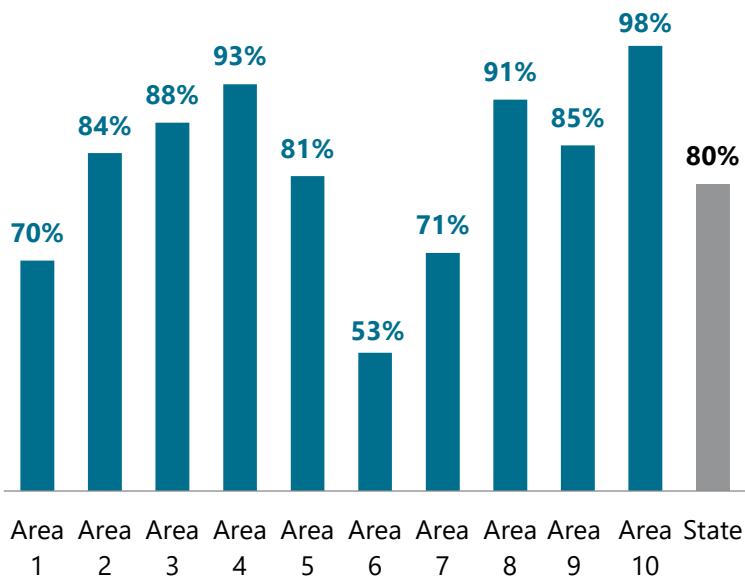

Figure 36
Foster Child Monthly Visits by Area

DISCUSSION

STRENGTHS

DCFS made 80% of its required visits to see both families with in-home cases and children in foster care during SFY 2024, an improvement over its visitation rates in previous years. Even though DCFS did not meet its statewide goal for either of these metrics, agency workers in select parts of the state performed comparatively well at making their required in-home and foster child visits. In particular, Areas 4, 8, and 10 each completed at least 90% of in-home visits and 91% of visits to see children in foster care, above the statewide averages.

AREAS FOR IMPROVEMENT

DCFS's efforts will need to become more consistent throughout all ten areas to consistently reach its in-home visitation goal of 85% and foster child visitation goal of 95%. Area 10 was the only area to meet both of these marks for 2024. Improvement is more imperative in certain areas of the state than in others. Area 7 completed less than two thirds of its required in-home visits, and Area 6 completed a little more than half of its required foster care visits.

DCFS is addressing the struggles observed in Area 6 (i.e., Pulaski County). During 2024 DCFS consolidated its four Pulaski County offices into three. The expectation is that this will result in the more efficient training and utilization of agency staff, and consequently an improvement in the monitoring of families and children.

APPENDIX: TABLES
